

SWELTER HOUSE

HOODED FIRE PLACE

Oversized and visually dramatic our fire place is designed to make a focal point of the fire. Rather than modern designs which look like an appliance protecting its owners from the scary flames, the Swelter House fire place is open with a large fire box which plenty of room for logs and flames. What's more, it's available in a dual sided version too. And for out door use we designed a pedestal so it can be free standing.
