

SWELTER HOUSE

COMBINATION POOLS

For our SH120, we realized we had to make the most of our limited footprint. Accordingly, we invented a combination cold plunge, jetted hot tub. With a rapid release drain and the ability to refill using hot or cold water the pool can go from a frigid 40 degrees to a luxurious 104 degrees in a matter of hours. It's common for the summer months to align with the desire for the cold plunge and the winter time brings interest in the hot tub. Either way with our remote mobile app, one can start the heater or chiller prior to arrival so the tubs are ready to accommodate whatever it is that one desires.

SPECIFICATIONS & DIMENSIONS

overall height 43"

overall width 65"

overall length 72"

inside diameter 60"

depth of tub 42"

power requirement 240v 1 phase 23 amp for heater 3.8 amp for pump

120v 1 phase 10.2 amp for chiller 0.9 amp for pump

filter maintenance schedule. change every 6-12 months depending on use

salination requirement add salt periodically depending on use

min / max temperature 39 degrees / 104 degrees F

shipping weight 850 LBS

capacity 500 gallons.
